

FOOD SAFETY AND QUALITY POLICY STATEMENT

Beams Packaging Services (BPS) are a co-packing operation for diverse customers across the food and drink sector. It is the policy of Beams Packaging Services to ensure the supply of products that are safe and legal by meeting legislative requirements pertaining to the food and drink industry. BPS are also fully committed to ensuring agreed quality standards are met with regards product quality.

The following points form the basis of the BPS food safety and quality policy:

- To implement and maintain a robust quality management system by means of the procedures, policies, work instructions and supporting documents contained within the quality manual.
- The development, implementation, and review of the HACCP plan, together with food defence and authenticity systems.
- To provide customers with product which is fully compliant with agreed standards and specifications and which considers all relevant technical, commercial, statutory, safety and environmental requirements.
- To provide adequate training for all employees, particularly those whose work affects product safety and quality, to achieve these aims.
- To devote the necessary resources in terms of manpower and finance to the food safety and quality assurance program.
- To ensure that all employees are aware the company's commitment to product safety and quality, and of their individual responsibilities to product safety and quality.
- To ensure that all employees are aware of the company's commitment to providing a safe place of work and of their individual responsibility to health & safety.

By following these values, we shall ensure continuous improvement with regards product safety, legality and quality and compliance to customer codes of practise.

Signed 

Bob Russell
